

Homework Saplings Class

Wednesday 10th January 2018

Maths

Since returning from Christmas, we have been rotating images and ourselves by making whole, quarter, half and three quarter turns. We have also been collecting information by asking questions and recording the answers in tally charts. We have then put this information on bar charts and pictograms. Can you survey your friends and family and put the information on a chart? Maybe you can find out their favourite foods, singers, films or colours. You will get a team point for each type of chart that you draw.

English

We have learnt so much in English this year already and we can include so many impressive features in our writing: exclamations, questions, commas, expanded noun phrases, conjunctions, adverbs and apostrophes. Now we just need to remember to use them all, as well as check that we have included capital letters and full stops! Whenever you write, try and use as many of these features as possible. You know that if you bring some writing in to school you will receive team points.

Reading

You have a new Reading Passport to complete this term by Monday 5th February. Don't forget, Reading Pro and Purple Mash may have some different books that could count towards your passport challenges.

Many thanks

Mrs Swansborough and Miss Ellis
