

Homework Saplings Class
Wednesday 14th March 2018

Maths

This week we have been feeling objects to compare their mass. We have also been weighing them using balances, cubes and weights. Choose two or more objects to compare and draw, using $<$ and $>$ to show which has more mass. Do you have weighing scales at home? Can you weigh an object using grams and kilograms? Maybe you could weigh yourself!

English

In English this week we have been thinking about how using one really impressive wow word is better than using a lot of boring adjectives. If you read or spot a really impressive wow word anywhere, write it down and bring it in to school to add to our wow word wall.

Reading

Our house point containers have been overflowing with all of the team points earned for reading at home. Keep it up!

Many thanks

Mrs Swansborough and Miss Ellis
